...the challenge is returning him
back into a cube.

Once you've conquered Cubebot®, give Julien and Guthrie a try.

They're brainier, brawnier, and more challenging than their Cubebot® cousin.

Julien (Medium)

Cubebot (Easy)

Guthrie (Hard)

Cubebot® was designed by David Weeks Studio in 2010, who was inspired by wooden Japanese Kumiki puzzles.

CUBEBOT

XL Cubebots include an engraved autography.

CUBEBOT MULTI
I'm every Cubebot
Rainbow Connection in wood
Everyone's welcome

WHOLESALE SHOP ONLINE STORE LOCATOR ABOUT

The image shows a screenshot of the Cubebot website. The page is framed by a colorful border of small icons, including faces and circuit-like symbols. The main content area is white and contains the text 'CUBEBOT MULTI' and a description: 'I'm every Cubebot, Rainbow Connection in wood, Everyone's welcome'. Below the text are two images: a large, multi-colored lollipop and a robot figure constructed from colorful wooden blocks. At the bottom of the page, there are navigation links: 'WHOLESALE', 'SHOP ONLINE', 'STORE LOCATOR', and 'ABOUT'. The word 'CUBEBOT' is also visible in the top left corner of the page.

About the Designer

David Weeks was born in Madison, Wisconsin, raised in Athens, Georgia, and educated in Providence, where he received his BFA in painting from the Rhode Island School of Design. Weeks founded his namesake studio in DUMBO in 1996 as an umbrella for his diverse interests, ranging from metal fabrication techniques to contemporary toy culture. Brooklyn's unique amalgam of the industrial and the artisanal informed Weeks' sensibility, and his work in turn helped define the independent design movement that took root there: one that championed the maker and whetted contemporary styling and old-school craftsmanship.

Over the past two decades, his product line has evolved from a core grouping of elemental lighting fixtures to a broader collection of upholstered seating, side tables, and sculptural objects with a simpatico sense of materiality and detailing.

FAQ

Q: How does Cubebot® work?

A: Cubebot® is made from wood and has durable elastic joints. These joints allow Cubebot® to be easily folded and posed.

Q: What ages is Cubebot® appropriate for?

A: Ages 3 and up.

Q: Who designed Cubebot®?

A: David Weeks Studio designed Cubebot® in 2010 in New York City.

Q: Do Cubebots® have different faces?

A: Yes, each color of Cubebot® has a slightly different expression and personality.

Q: Can I customize Cubebot® with my logo?

A: Yes, your logo can be silkscreened or laser engraved onto Cubebot® through our promotional partner.

Q: What is the best-selling Cubebot®?

A: The micro multicolor is the best-selling Cubebot®.
